MINES GEORGIA TECH

ΘM/COLORADO SCHOOL OF MINES

Just as Theta was a pioneer in the women's fraternity movement, Colorado School of Mines (known familiarly as Mines) was a pioneer in developing a curriculum and research program geared toward responsible stewardship of the earth and its resources.

On November 5, 54 women, including four legacies, were initiated by Theta Mu. Two of the charter members, Dana and Abbie Steiner, are now Theta sisters as well as biological sisters; their mother, Nancy Hudson Steiner, is a member of Delta Kappa/LSU.

Theta joins National Panhellenic Conference groups Alpha Phi, Sigma Kappa, and Pi Beta Phi on the Mines campus, which is located in Golden, Colorado, outside Denver.

Thank you to Theta officers and staff whose hard work helped make these events successful.

Contributors: Kassie Dobbs, Alyssa Franco, Alex Johnston, and Meghan Finke, Theta educational leadership consultants providing support to these new chapters.

ΘN/GEORGIA TECH

Students at Georgia Tech represent 114 countries; echoing that diversity, the Thetas of the Theta Nu Chapter hail from Canada, Russia, Vietnam, the United Arab Emirates, the United Kingdom, and Jamaica, as well as the US.

On November 12, the chapter was installed, and 65 new members were initiated. "I joined Theta because I loved the idea of getting to help shape an organization that helps to strengthen women through college and beyond. Every woman in Theta is unique in her own, amazing way and I can't wait to see how we can use our diversity to influence Georgia Tech and the world," said Kelby Mathis, chief recruiting officer.

Georgia Tech's campus is located in Atlanta. Theta joins Alpha Gamma Delta, Alpha Delta Pi, Phi Mu, Alpha Phi, Alpha Chi Omega, Alpha Xi Delta, Zeta Phi Beta and two associate chapters, Alpha Delta Chi and Alpha Omega Epsilon, in the Collegiate Panhellenic Council. ♦
